Education

Motilal Nehru National Institute of Technology, Allahabad

August 2023 – Present

Bachelor of Technology in Computer Science and Engineering (CGPA - 8.49)

Modern Indian School

May 2023

AISSCE – CBSE, Science (PCM) (94.2%)

Whitefield Secondary School

May 2021

NEB – (4.0/4.0 G.P.A)

Relevant Coursework

- Data Structures
- Algorithms
- Operating Systems
- Database Management System
- Object Oriented Programming
- Computer Networks

Projects

Grocify – A Grocery Delivery Website

May 2025 – June 2025

ReactJS, ExpressJS, Tailwind CSS, Stripe API, MongoDB, Vercel, Axios, Gemini API

[GitHub](#) [Live Project](#)

- Built a full-stack grocery delivery platform using the MERN stack with features like product listing, cart tracking, Stripe checkout for real-time secure payments, and order management, emulating a real-world e-commerce solution.
- Developed a role-based admin panel with JWT authentication, enabling sellers to manage inventory and orders securely.
- Implemented a chatbot feature powered by Gemini API to assist users with product queries, cart help, and customer support, enhancing user engagement.
- Deployed the complete grocery delivery website to Vercel, enabling automatic updates on code changes, environment variable management, and live public access with fast global delivery.

QuickAi – AI Powered SaaS Platform

June 2025 - August 2025

ReactJS, ExpressJS, PostgreSQL, Clerk, Cloudinary, Vercel, Axios, Generative AI APIs

[GitHub](#) [Live Project](#)

- Developed a full-stack AI SaaS platform using the PERN (PostgreSQL, Express, React, Node.js) stack, offering a suite of on-demand AI-powered content and image manipulation tools.
- Implemented a complete user management system using Clerk, handling secure authentication, profile management, and subscription billing for premium feature access.
- Integrated multiple third-party generative AI APIs to deliver diverse features, including an article generator, image generator, background remover, and an automated resume analyzer.
- Designed and managed a scalable database schema using Neon's serverless PostgreSQL to efficiently store user data and AI generation history.

Achievements / Certifications

Hack36 Hackathon, MNNIT Allahabad

November 2025

Participated in collaborative project development, working continuously for over 35 hours in a dynamic team environment. Engaged in knowledge exchange, drawing inspiration from diverse ideas and innovative approaches.

Technical Skills

- **Languages:** C++, C, Python
- **Developer Tools:** Visual Studio Code, Github
- **Technologies/Frameworks:** ReactJS, NodeJS, ExpressJS, MongoDB
- **Development Skills:** Full Stack
- **Soft Skills:** Teamwork, Communication, Active Listening
